

# DIPK: correcting the evaluation label changes measured discrimination

GSE25055 | Same 306 patients and saved scores | 90 labels differ (29.4%)

2,000 paired patient bootstrap draws, seed 20260926. Four patients with missing observed response excluded from both targets.

Saved predictions recalculated; no retraining. Scores are negative predicted LN IC50. Corrected association remains; this is not a clinical-use validation.
